

## **Inclement Weather**

In the event of an electrical storm, patrons will be cleared from the pool and deck, and will remain cleared for a minimum of 30 minutes after the last sign of lightning/thunder. Staff will direct patrons to seek shelter, if needed. Red Cross Guidelines

During heavy rain the outdoor pools will be cleared when lifeguard staff can no longer see drain grates or lane markings on the to the bottom of the pool. Turbidity and continuous disturbance at the surface of the pool causes unsafe swimming conditions since the swimmers under the surface of the water cannot be seen.

In case of severe weather, such as tornado watch, or tornado warning and thunderstorms, pool will be closed. If such events occur while patrons are present they will be directed to seek shelter.
